

SUPPLEMENTAL LABELING

Chlormet™ Herbicide

EPA Reg. No. 352-445-85588

PLUS STARANE¹ HERBICIDE

GENERAL INFORMATION

Chlormet™ herbicide can be tank mixed with Starane herbicide for improved control of broadleaf weeds in wheat, barley, and fallow.

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

DIRECTIONS FOR USE

For improved control of Kochia (2-4' tall), Russian thistle, mustard species, and wild buckwheat, Chlormet™ herbicide may be tank mixed with 1/3 to 1 1/3 pints per acre of Starane. Refer to the Chlormet™ herbicide label, and the Starane label information regarding use restrictions, labeled crops, rotational cropping recommendations, sprayer cleanup, use precautions and other information. The most restrictive provisions on either label will apply. Do not use the tank mix if any restrictions on the Starane label conflict with recommendations on the Chlormet™ herbicide label.

Other suitable registered herbicides, fungicides, and insecticides registered for use on small grains or fallow may be tank mixed or used sequentially with this mixture. Read and follow all manufacturer's label recommendations for the companion herbicide. The most restrictive provisions on either label will apply. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT

BEFORE USING CHLORMET™ HERBICIDE, READ AND CAREFULLY NOTE THE CAUTIONARY STATEMENTS AND OTHER PROCEDURAL INFORMATION APPEARING ON THE EPA REGISTERED LABEL OR ON OTHER SUPPLEMENTAL LABELS.

This bulletin contains new or supplemental instructions for use of these products in combination which does not appear on the package label.

Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
